

Secure Enterprise Asset Management, Inc. (SEAM) is a privately held small business that provides IT asset recovery, data destruction, and environmentally safe electronics recycling services to commercial, not for profit and government organizations.

Our compliant and secure solutions for surplus and used computer, telephone, networking and other electronic equipment allows Federal Agencies to maintain compliance with Executive Order 13834 in regards to disposal or End-of-Life Management of Federal Electronic Assets.

CORE CAPABILITIES

Full Service IT Asset Lifecycle Management:

With a flexible, hands on approach, we manage all aspects of the IT asset lifecycle process from collection and transport to end-of-life processing and tracking, relieving the responsibilities of the customer.

Total Data Destruction and Wiping:

Customers may choose between on or off-site hard drive and media shredding or complete data erasure in compliance with NIST 800-88r1 Standards for secure destruction of data. All labels and asset tags are completely removed to ensure your equipment is no longer associated with your organization.

Comprehensive, Accessable Reporting:

Chain of custody documentation is made available 24x7 on our web-based Customer Portal to provide complete, asset-based transparency of the entire process which can be used for asset tracking and auditing purposes.

Pickup and Recovery Services:

SEAM's professional team of technicians are deployed to your location for collection, packing and loading of all equipment to ensure security and control of the total logistics process.

Certified IT Recycling:

Third-party audited, certified electronics recycling for end-of-life devices provided with a Certificate of Destruction and Recycling ensures security and environmental requirements are met.

Remarketing and Revenue Share:

As experienced resellers of IT equipment, we provide value back from your assets with our revenue share program.
